

MONTHLY COMMENT

Digital assets, such as Bitcoin and Ethereum, are a fast developing and emerging asset class playing a significant role in the evolving digital age. Currently, hundreds of emerging companies are forming within this new ecosystem, taking advantage of its potential to improve efficiency and reduce friction across transactions, thus creating this new asset class.

After technology professionals and retail investors, the digital asset space has now drawn the attention of institutional investors with its potential to shape the future of finance and by providing appealing portfolio diversification. Furthermore, with the demands of the macroeconomic backdrop, managing cash and achieving portfolio diversification has become ever more challenging and meaningful to investors, paving the way for this new and technologically innovative asset class. The Crypto Market Index Fund provides essential exposure to this market by covering the ten largest assets in the sphere.

THE CRYPTO MARKET INDEX FUND

The Crypto Market Index Fund is the first Swiss crypto fund. It was approved by FINMA in September 2021, and enables institutional and professional investors to participate in this exciting asset class. A strong partnership between the Swiss companies PvB, SEBA Bank, and Crypto Finance (Asset Management) AG enabled this all-Swiss venture, and puts Switzerland, once more, in the vanguard of the digital era.

INVESTMENT OBJECTIVE

The investment objective of the Crypto Market Index Fund (the "Fund") is to passively replicate the Crypto Market Index 10 (the "CMI10"). The Fund invests in a large-cap crypto asset portfolio, weighted by market capitalisation in line with the CMI10. The Fund may employ optimised sampling to replicate the index - this is especially the case where the assets are not available at the depositary's cold storage solution.

The Crypto Market Index 10 is administered and calculated by SIX Swiss Exchange AG. The Index contains up to 10 crypto assets and weighs them according to their market capitalisation with quarterly rebalancing. The prices for the crypto assets and tokens are obtained from multiple trading venues. The SIX Crypto Market Index 10 was standardised at 1000 points on 30 December 2016, and has been calculated on an ongoing basis since 09 January 2018. To be considered for the Index, a crypto asset must pass a minimum threshold for market capitalisation and trading volume. Indexed, pegged, and anonymity-centred crypto assets are ineligible. A reliable multi-signature secure storage solution must exist to be eligible. The rulebook of the Crypto Market Index 10 can be found on the SIX Swiss Exchange AG website.

ABOUT CRYPTO FINANCE

The Crypto Finance Group was founded in June 2017 and provides transformative financial services in crypto and blockchain technology for institutional clients. The group provides a full suite of professional digital asset financial services:

- Asset Management
- Brokerage
- Storage Infrastructure & Tokenisation

Our Asset Management is the first FINMA-regulated crypto asset manager for collective investments and allows traditional investors to participate in the emerging digital asset class with professional, secure, liquid, and transparent exposure. Regulated crypto exposure is provided through traditional investment vehicles: All Crypto Finance (Asset Management) AG products meet the due diligence requirements of traditional funds, and investors benefit from several unique advantages, including easy and secure access and leadership in the sector.

RISK AND REWARDS

The Crypto Market Index Fund is a contractual investment fund under Swiss law in the category "other funds for alternative investments" with special risk for qualified investors, which invests in Crypto Assets as described in Section 9 of the Prospectus and in § 8 of the Fund Contract. The risks of the Crypto Market Index Fund are not comparable to those of securities funds due to the assets invested in. The fund will make the investments without leverage, but may temporarily borrow 25% in the event of liquidity bottlenecks, particularly when handling redemptions. Namely, the total risk exposure of the investments will thus be a maximum of 125% of the net asset value. Nevertheless, the volatility of crypto assets is very high and the purchase and sale of the crypto assets involves greater settlement and counterparty risks than with traditional investments. Investors' attention is expressly drawn to the risk warnings contained in the prospectus. Individuals investing in the Fund must be prepared and able to accept capital losses, including a total loss.
